Proven mid-career professional culminating a career transition into hands-on tech pro. Looking to work my way up within a strong team.

## EDUCATION:

**College of Idaho – Caldwell, ID** - Bachelor of Arts: Music Education

## EXPERIENCE:

### 04/2018-Present – Autodidactic Software Developer

- Completing a professional sabbatical designed to acquire baseline computer science skills required for entry into a computer technology field
- Deployed portfolio [portfolio website](#) and releasing iterative updates. Technologies utilized include Jekyll, Liquid, html/css and jQuery. Hosted on GitHub pages with custom domain via DNS configuration
- Building [dynamic web application](#) (hosted on heroku's free tier, which requires a server instance to spin up from suspended state, so it might take a few seconds for the site to initially load) using React, node.js, Express, pug, bootstrap REST API, and PostgreSQL. The concept for the application is to serve as a companion app for a video game, allowing for advanced search of game events. Source code github repo [here](#)
